Custom Manufacturing

We can do...

We are professional of these compounds

1. Chiral compounds
2. Carbohydrate chemistry
3. Peptide synthesis
4. Create a new synthetic route which is different from patent route (avoid patent) (For example, we have successfully developed Rosuvastatin T-Butylaminesalt etc.)

We are specialized in these reactions

1. Grignard reagent
2. Oxidation / Reduction
3. Ring closure reaction
4. Condensation reaction
5. Halogenation
6. Nitration
7. Amination

We have special facilities that can meet these circumstances

1. High vacuum (reach 1mmHg)
2. Low temperature (reach -100°C)
3. Enzymic catalytic reaction
